The first of the named PFEIFFER HYBRIDS,
a large, graceful white, marked with a sunburst
of deep gold over the corolla.

*Initially exhibited at the North American Lily Society
Show in Boston in July, 1955, under the auspices of
the Massachusetts Horticultural Society, it received a
Vote of Commendation from the N.A.L.S. and an Award
of Merit from the M.H.S.*

*** THE PFEIFFER HYBRIDS ***

Dr. Norma E. Pfeiffer after more than 15 years of hybridizing at the Boyce Thompson Institute for Plant Research produced a group of L. AURATUM x L. JAPONICUM and L. AURATUM x L. RUBELLUM hybrids of great beauty. Strawberry Hill is the sole commercial distributor of these lilies.

The PFEIFFER HYBRIDS are characterized by a wide range of colorings, markings, shapes, sizes, fragrance and time of flowering. The blooms vary in size from 3" across, to perianths of nearly 12", on stems from 18" to 5'. They bloom from the middle of June to the end of August. They run from the characteristic flower shapes, colors and growth habits of their blood lines to a remarkable blending of all three.

Last year we made our first offer of the PFEIFFER HYBRIDS to the gardening public. We are again offering a selection of these lilies, including some of the pink forms which have attracted so much attention and have won so many honors at exhibitions.

At the same time we are pleased to announce that Dr. Pfeiffer has also entrusted to us for distribution another group of hybrid lilies on which she has worked for many years. These are her MARTAGON x HANSONII crosses, a striking selection of clones in which L. MARTAGON ALBUM was the seed parent, but the flowers are extremely pleasant shades of gold and have petal reverses of delicate pink.

We offer for autumn, 1956, delivery the following PFEIFFER HYBRIDS:

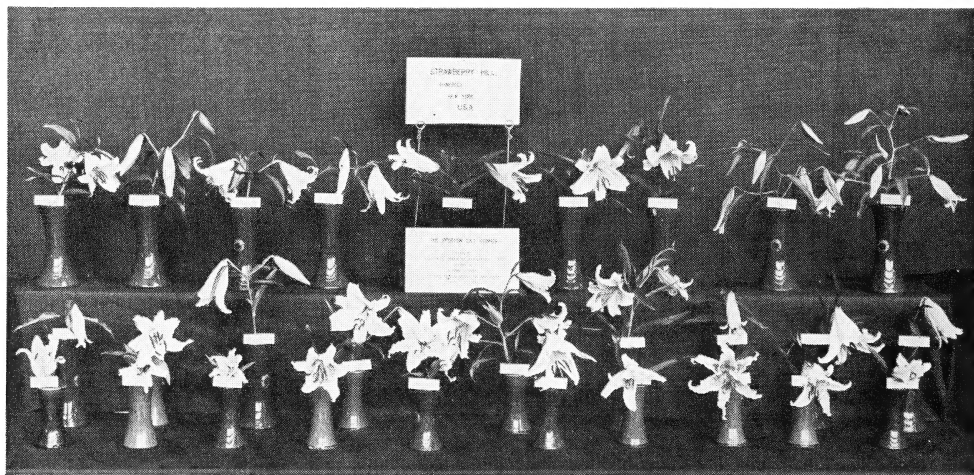

WHITES WITH MACULATION Each \$5.00. Flower large, bowl or star shaped, lightly or heavily spotted in rufous red.

PINKS Each \$6.00. Various shapes and shades of pink.

ELECTRA (Described on cover.) Prices on application.

PFEIFFER HYBRID SEED \$2.50 per pkt. This includes seed from the pink varieties.

L. MARTAGON x HANSONII 1 for \$3.75; 3 for \$11.00; 6 for \$21.75; 12 for \$43.00. Very large bulbs \$5.00 each. Seed \$1.75 per pkt.

- L. **WASHINGTONIANUM TYPICUM** Small bulbs \$5.00 each. The flowers remain white. This variety is extremely rare.

***** NOTE *****

Soil for Lilies: After a quarter century of experience with lilies we have found that the one type of soil most suitable for all varieties of lilies is a loose, coarse gravelly sand, made fertile with old compost, leaf mold and peat moss in a well drained site.

Planting Depths: With the exception of L. **TESTACEUM** and L. **CANDIDUM**, which should not be covered with more than two inches of soil over their tips, no matter how large the bulbs, virtually all other varieties will do best if planted at a depth which is approximately twice the height from base to tip of the bulb. Thus, if the bulb measures 2", it should be covered with 4" of soil. We believe that no bulb, whatever its size, should have more than 6" of covering soil, and even less where an all year 'round mulch is maintained.

An ideal and inexpensive way to grow lilies is from seed. It results in vigorous stock, and in the case of hybrids (marked * in the lists above) you may get something new and perhaps valuable. Our seed is hand pollinated. Minimum orders for seed alone are \$2.50. With each shipment of seed comes a leaflet prepared by the North American Lily Society telling how to grow them.—Which leads us to urge our customers to become members of the N.A.L.S. The Society's Year Book, newsletters, round robins and seed exchange are extremely valuable. We will be glad to send you an application blank and sponsor your membership.

We would draw our customers' attention to the fact that unless they specify otherwise when ordering lily bulbs, we will substitute a variety of greater price where we are unable for any reason to supply the specific item requested; or if we are unable to supply the larger sizes of a desired variety, we will send two or more smaller bulbs for the same price.

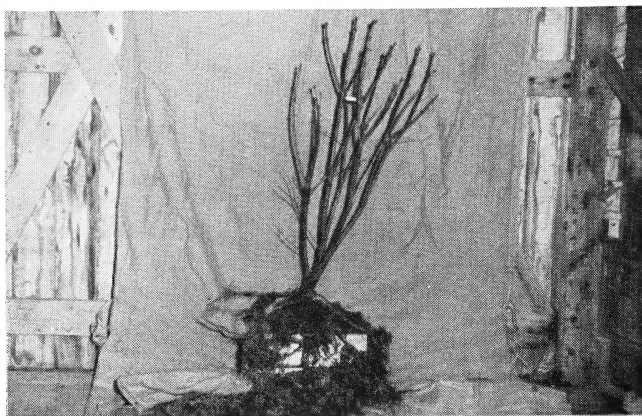

All lily bulbs are sent postpaid, but in view of high packaging and postal costs, on all orders under \$2.50 remittance should include an additional 50c. to cover handling. Where transportation is west of the Mississippi, 50c. should be added to help defray postal charges.

We offer the following valuable works on lilies:

By three of America's leading specialists—Dr. George L. Slate's "Lilies for American Gardens," \$5.00; Jan de Graaff's "The New Book of Lilies," \$3.50; Edgar L. Kline's "Reference Chart of Lilies for Garden and Greenhouse," \$1.00.

By international authorities—L. Tuffrey's "Lilies are Easy," \$1.00; Woodcock & Stearn's "Lilies of the World," \$8.25; Alice C. Maxwell's "Lilies in Their Homes," \$3.50.

***** OUR LILAC LIST *****

A typical Strawberry Hill lilac bush on its own roots from the day it was propagated as a cutting. Note the heavy, fibrous root system which assures easy transplanting and promises vigorous growth

We recommend a Lilac Walk as a lifetime adornment for your garden. Plant 8 or more varieties in parallel rows 12' apart and at least 8' between bushes. A grass path between the rows will make a promenade over which to stroll in the spring, to be enchanted by the colors and fragrance. To encourage the planting of Lilac Walks we will allow a special discount on all purchases of 8 or more varieties. We will also provide detailed instructions for selecting the site, installing the bushes, and maintaining the planting in a flourishing condition.

Unless a customer specifies otherwise we will substitute a nearly similar lilac where we are for any reason unable to supply the variety ordered.

Plants are shipped express collect in sizes above 18", otherwise parcel post prepaid.

We have a few extra fine specimen lilacs 5' and taller. Varieties and prices on application.

We recommend the American Association of Botanical Gardens and Arboretums' Lilac Survey, "Lilacs for America," as the best reference manual. It can be obtained from us for \$1.00. Every purchaser of five lilacs or more will receive a free copy.

STRAWBERRY HILL Special Peony Offer

We are pleased to be able to continue to offer these fine plants in units of 6, 12, 18 and 24, some of the old favorites and many of the most valuable varieties yet introduced. They are unlabelled but each unit will include species, early and late varieties, various colors, singles and doubles and only one of a kind. Divisions will have at least 5 eyes each and will be sent to you carefully packed in sphagnum moss immediately on being dug in September. Here is an opportunity to establish a peony planting at minimum outlay.

Prices are postpaid east of the Mississippi. Add 75¢ on 6 to 12 plants and \$1.00 on 18 to 24 plants to your remittance for shipments beyond the Mississippi.

6 for \$5.00; 12 for \$9.50; 18 for \$13.00; 24 for \$15.00.
